In the Matter of: Wireline Competition Bureau Seeking Comments on E-rate Category Two)WC  
Docket No. 13-184

I am pleased to be able to provide input on the impact of having access to secure and sufficient funding for our library WiFi and internal connections. Before the E-rate Modernization in 2014, virtually no libraries received funds for then, Priority 2 services. Unless we were at a 90% discount rate, we could assume there would be no funding left after all requests for internet access were funded. USAC data shows that most libraries are eligible for a 70% discount or less and according to the American Library Association, many libraries stopped bothering to apply for WiFi funding.

In communities across the country, people turn to the library to use our WiFi on their tablets, laptops, and other devices. Library users are downloading job applications, applying for financial aid, seeking health information, and communicating with family--all dependent on a strong WiFi signal. So far in 2017, we have had 29,968 uses of our wifi at the library and in 2016 we had 37,838 uses. Since many families in our community cannot afford wireless service we have many students who come to the library to complete their homework. Libraries everywhere know WiFi throughout the library is not a "nice to have"--it's a core community service.

With the commitment of the FCC to ensure a library budget of \$2.30 (\$5.00 for a selected category of larger urban and suburban libraries) per square foot, libraries can finally upgrade outdated equipment or plan for new construction. They have confidence that desperately needed support will be there.

Please maintain secure funding through the full five year budget period as adopted during the 2014 Modernization. Our communities depend on that funding.

Sincerely,

Rochelle A. Westerhaus  
Library Director
